| Project Name  | Automated network request management |
| Maximum Marks | 2 Marks                              |

#### Customer Problem Statement

The Automated Network Request Management in ServiceNow project is designed to simplify and accelerate the management of network-related service requests. By leveraging ServiceNow's service catalog, workflows, and automation capabilities, the solution minimizes manual intervention and eliminates process bottlenecks, ensuring requests are handled efficiently. End users can easily submit requests through a self-service portal, while automated routing, approvals, and task assignments streamline the fulfillment process. Where applicable, integration with network automation tools enables end-to-end request execution with minimal human involvement. This approach results in faster request fulfillment, improved SLA compliance, enhanced operational efficiency, and greater visibility for both end users and IT teams.

| Aspect                                                                                            | Description in context of our project                                                                                                                                                                                    |
|---------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  I am          |  We are ServiceNow developers and IT automation enthusiasts working on building an automated network request management solution.     |
|  I'm trying to |  Build a streamlined way for users to submit network requests and automate the entire approval, fulfillment and notification process. |
|  But           |  Currently, the process is manual and time-consuming, leading to delays, errors, and limited visibility.                              |
|  because       |  Requests are routed through emails and spreadsheets with no automation, proper tracking or SLA compliance.                           |
|  which makes   |  The solution valuable by providing faster request handling, improved accuracy, better transparency, and higher user satisfaction.    |

| Problem Statement (PS) | I am (Customer) | I'm trying to | But | Because | Which makes me feel |
|------------------------|-----------------|---------------|-----|---------|---------------------|
| PS-1                   |                 |               |     |         |                     |
| PS-2                   |                 |               |     |         |                     |
